SUBJECT INDEX 1963

This index covers all reading matter in Volume 12 of DIABETES. Entries marked with an asterisk (*) indicate material that appeared in the Abstracts only. Those preceded by the letter "A" refer to Abstracts of Presented and By Title Papers, 23rd Annual Meeting of the American Diabetes Association. The Abstracts were published in the July-August issue, pages 352-375. The Author Index appears on page 14.

A

ACETATE, conversion to fatty acid, *89
ACETOACETATE, and liver enzymes, *281

ACETOHEXAMIDE, 252-256, *382
comparison with tolbutamide, *89

ACID
See also specific acid
adenylic, and glucose utilization, *89
linoleic
and cholesterol, 65
incorporation in adipose tissue, A372
after insulin, *87
and myocardial infarction, *564
ribonucleic, and glucose oxidation, *89
uric, in serum, A373

ACIDOSIS
lactic, *377
and phenformin, *385
hydrochloride, *376
metabolic, *94

ACIDOSIS, DIABETIC
and fatty acid radioactivity, A361
and lacticacidemia, A369
and myoglobinuria, *467
and pancreatic artery thrombosis, *565
and serum amylase, 142

ACROMEGALY
glucose response, 200
and insulin sensitivity, A366
and islet cell distribution, 62

ADDISON'S DISEASE
and kidney function, *87
and pregnancy, diabetic, *92, *94

ADRENAL GLANDS
dysfunction and thalidomide, *95
epinephrine release, 39
and fat mobilization, *92
insulin, response, *91
shock therapy, 43

ADRENALECTOMY
and hypophysectomy, *466
and pancreatectomy, 302
and hypophysectomy, 303
and pancreatic diabetes, 482

ADRENALIN. See Epinephrine

ADRENOCORTICOTROPIN
and Addison's disease, *94
ketonemic action, 483

ALBUMIN
effect on leucocytes, 548
extraction procedure, 406
and insulin-¹³¹I
Sephadex G 75 separation technique, 409

ALBUMINURIA, 47
during pregnancy, 215

ALCOHOL
consumption after gastrectomy, 82
and hypoglycemia, A367
and insulin, 246
and pancreatitis, *465

ALLOXAN
See also Diabetes mellitus, alloxan-induced
and beta cell sensitivity, 433-436
and glucose, *187
and islet volume change, 62
toxicity, 158

SUBJECT INDEX 1963

AMINO ACIDS

- excretion patterns in children, 443-447
- and growth hormone, *94
- protein metabolism regulation, *186
- and insulin antigenicity, *567

AMYOTROPHY, *92, *285

ANEMIA

- and desferrioxamine, *185
- pernicious, *376, *383

ANEURYSMS. *See* Microaneurysms

ANGIOPATHY

- and diabetic control, 34
- and sexual disturbances, 520
- of small vessels, *92

ARTERIOSCLEROSIS, chemico-anatomic studies, *563, *564

ATHEROSCLEROSIS

- and cholesterol, 81, 140
- and diet, 127, 322, A355, *466
- and pulse wave velocity, *95
- in St. Kitts, West Indies, *384

AZEPINAMIDE, and jaundice, *385

B

BENZOTHIADIAZINE, and carbohydrate metabolism, A354

BIGUANIDES

- and hypoglycemia, *382
- with insulin and sulfonylureas, *377
- insulin-potentiating effects, *378

BLINDNESS, and retinopathy, 391

BLOOD

- calcium, 126
- cerebrospinal fluid and glucose, *95
- coagulation defect, 322
- fibrinolytic activity, *378
- and free fatty acids, 39, *190
- fructose, *282
- glycoproteins, 223
- insulin, *88, 515
- Antoniades chromatography, 79
- free and complex, A365
- like activity, *88
- lactic acid, *377
- and metabolic acidosis, *376
- and phenformin, 420-423
- lipids, *87, 208-212
- mural cells, loss of in retinopathy, 295
- pentose levels, *94
- red cells, and ribose-C-14, *283
- triglycerides, *88
- urea, *190

BLOOD FLOW. *See* Circulation

BLOOD GLUCOSE. *See* Blood sugar and adrenergic amines, *380 and alloxan, 433 after anti-insulin serum, 73, 539

- arterial, and tolbutamide, 417
- after carbohydrates, *280
- and cerebral function, 42
- and cerebrospinal fluid inactivity, *383
- after chlorpropamide, 82
- and cortisone, 165
- and epinephrine, 44, *190
- fasting
 - and hypoglycemia, *464
 - and insulinomas, *93
 - and skin-surface glucose, 51
 - and tolerance to oral glucose, *282
- and glucagon, *282
 - anabolic drug effect, A375
 - after glucose, 198, 205, 438, 538
 - and growth hormone, *567
 - at high altitudes, *190
 - and hyperglycemia, 540
 - and hypoglycemia, 42, *377
 - hypophyseal and adrenal factors, 304
 - in infants, *462
 - and insulin
 - and glucagon, *86
 - effect on glucose pool, 16
 - and lipoprotein lipase activity, 175
 - and manganese chloride, *286
 - after morphine sulfate, *186
 - after nephrosis, 156
 - and obesity, 59, *465
 - and pancreatectomy, 239
 - during pregnancy, 314
 - and serum insulin-like activity, 341
 - sex differences in metabolism, A371
 - after starvation, 333
- tests
 - Folin-Wu, modification of, 243
 - Haden method, 208
 - Hagedorn-Jensen method, 414
 - Halsey method, 174
 - Miller and Van Slyke, 324
 - Nelson-Somogyi, *91, 162, 197, 205, 399
 - Somogyi copper iodometric method, 8
 - Somogyi-Nelson, 39, 53, 56, 67, 75, *188, *282, 319, *462, 509
 - stripped skin glucose, 54
 - Technicon AutoAnalyzer, 50, 74, 238, 538
- venous and capillary, *91

BLOOD PRESSURE

- See also* Hypertension
- in diabetic children, *381
- hypertension, diastolic and systolic, 46
- and hypoglycemia, *454

BLOOD VESSELS

- and angiopathy, *92
- aorta
 - and cholesterol deposits, 65
 - lesions and diet, 140
- capillary
 - basement membrane changes, 100, 110, 225
 - degeneration in retinopathy, 100

- distention in retinopathy, 295
- gastrointestinal and skin, angiopathy, 431
- glucose, *91
- and islet intercepts, 64
- and perinuclear degeneration, 75
- cholesterol content, 35
- and diabetes duration, 33
- microangiopathy in fingers and toes, 222
- and prediabetes, 511
- renal, aspergillus obstruction, *87
- veins, and glucose, *91

BONE MARROW, peptic synthesis, *381

BOOK REVIEWS

- Annual Review of Biochemistry, edited by J. Murray Luck, 351
- Biochemical Frontiers in Medicine, ed. by Harris Busch, 561

November-December, 481-574

SUBJECT INDEX 1963

DIHYDROXYACETONE PHOSPHATE
138

DIMETHYL-DIGUANIDE HYDRO-
CHLORIDE, and ketosis,
142

4-DIMETHYLAMINO-N-METHYL-2,
2-DIPHENYL-, HYDRO-
CHLORIDE, and glucose
output, *188

3,5-DIMETHYLPYRAZOLE, hypogly-
cemic activity, A354

DIURESIS, and renal glucose metabo-
lism, *380

E

EDEMA, in children after treatment,
*91

ELECTROCARDIOGRAM
and arteriosclerotic heart disease, 46
and glycosenosis, generalized, *87

ELECTROPHORESIS
of growth hormone, *466
and insulin-I¹³¹, 409
"damaged," *86
with gamma- and alpha-globulins,
260
protein patterns, *383
of serum, 144

ENDOCRINE GLANDS, adenoma syn-
drome, 249-251

ENZYME SYSTEM
and glucagon, *95
glycogen synthetase deficiency, *564
and hypophysectomy, *95
and insulin, 245

EOSINOPHILIA, islet and stromal, 532

EPINEPHRINE
blood glucose responsiveness, *377
and free fatty acids, *186
release, 138, *568

July-August, 293-388

September-October, 389-480

November-December, 481-574

SUBJECT INDEX 1963

GLUCOKINASE

- hepatic
 - diet and insulin effects, A359
 - in normal and alloxan-diabetic rats, 3

GLUCONEOGENESIS

- and diet, *283
- and hypoglycemia, *464
- and insulin infusion, 26
- regulators and ethanol, A361
- after starvation, 334

GLUCOPHAGE. *See* dimethyl-diguanide hydrochloride

D-GLUCOPYRANOSE, BETA, 53

GLUCOSE

- and alloxan, *187, 433-436
- and blood flow, *90
- compared with leucine and tolbutamide, A363
- and carbohydrate metabolism, *190
- cycloacetate and thiamine deficiency, 161
- through decornified skin, 53-55
- and fatty acids, *88, 134, *190, *567
- and fructose, *568
- and glycoprotein synthesis, 228
- hepatic, and glucose loads, 9
- and hyperglycemia, *95
- intrapancratic infusion, 437-442
- intravenous infusion, and serum insulin-like activity, 505
- and insulin, 20-21, *286, 424, 440
- isotope dilution technique, 12, 26
- loading, and plasma insulin, *467
- metabolism
 - hepatic, and tissue utilization, 16-30
 - after hepatectomy, 324
 - and insulin, 3, A370, *383
 - and lipoprotein lipase activity, 176
 - and mannoheptulose, *187
 - in pregnant and nonpregnant sheep, *280
- oxidation
 - and albumin extracts, 408
 - in red cells, *94
 - and ribonucleic acid, *89
- pathways, *93
- phenylglucosazon derivatives, 53
- after phlorizin or phloretin, *187
- production, extrahepatic, 150
- and serum insulin-like activity, *284
- skin-surface test, 50-52
- tolerance, 563*
 - and blood sugar levels, *282
 - and ischemic renal failure, *190
 - after nibbling and gorging, A358
 - and prediabetes, 503, 508
 - and renal disease, *377
 - starvation effect, 332-334
- tolerance tests, 53, A366
 - and age, parity, and length of gestation, 315
 - and chlorpropamide therapy, 82-83
 - and chondrosarcoma, *565
 - glucose-oxidase paper method, 50

- in infant, *90
- intravenous, 345, 398, 510
- oral, 343, 401, 509, *563
- and portacaval shunt potency, *379
- during pregnancy, A356, A363
- and serum insulin-like activity, 343
- and skin disease, *565
- two-antibody assay method, 120
- and transhepatic catheterization technique, 26
- uptake
 - and albumin extracts, 407
 - and insulin, *88, 546
 - in liver during loading, 8
 - by muscle, *382
 - after pancreatectomy, *189
 - after prolonged insulin infusion, 18
 - by rat epididymal adipose tissue, *86
 - and serum insulin, *384
 - by uterus, *187
 - utilization, 17
 - and quinidine, *465
 - venous-arterial, and glucose loads, 9

GLUCOSE C-14

- and body glucose pool, 16
- continuous infusion, 2
- after hepatectomy, 150
- in red blood cells, *283

GLUCOSE-6-PHOSPHATASE

- activity in liver and kidney, *87
- dehydrogenase, *95
- in infants, *562
- and glycogen storage disease, *91, *464
- glycogen synthetase activation, *385

GLUTATHIONE

- insulin transhydrogenase, *95, *466
- reactions to, *90
- and serum insulin-like activity, 503

GLYCEROL, and epinephrine, *568

GLYCOGEN

- in beta cells, 165
- deposition, 162
- in edematous children, *91
- enzymic determination, *283
- in kidney tubules, 59
- level in diabetics and fasted subjects, 4
- in liver, 22, 25, *384, *562
- storage disease, *87
 - and glucagon tolerance, *91
 - of muscles, *88
 - and renal disease, *377
 - and serum insulin-like activity, 341
- synthesis, and albumin, 408, 547
- from uridine diphosphate glucose, *385

GLYCOGENOLYSIS

- after glucose C-14, 25
- regulation, *463

GLYCOLYSIS, and respiratory inhibitors, *190

GLYCOPROTEINS

- distribution, 223
- metabolism, 227
- structure, 225

GLYCOSURIA

- after anti-insulin serum, 75
- and diabetes, *89
- after diazoxide and trichlormethiazide, 336
- diurnal variations, 33
- in infants
 - temporary, *90, *91
- after nephrosis, 156
- after phlorizin, 21, 57
- and stripped skin glucose test, 54

GROWTH HORMONE

- and amino acid
 - accumulation, *94
 - transport, *186
- and beta cell alterations, 162
- and diabetes production, *93
- and hyperinsulin response, 202
- and hypoglycemia, *567
- and lipolysis, 138
- metabolism, *466
- and pancreatic transplants, *381
- and quinidine, *465

H

HAWAII, *286

HEART

- disease
 - arteriosclerotic, 46
 - and diet, *384
 - ischemic, and blood fibrinolytic activity, *378
 - and lactate therapy of acidosis, *377
- hypoglycemic arrhythmia, *87
- myocardium
 - and free fatty acids, *190
 - infarction
 - after insulin, *280
 - triglyceride levels, 210

HEMOCHROMATOSIS, and acute iron poisoning, *566

HEMORRHAGE, in retinopathy, 298, 391, 492

HEPATECTOMY

- and glucose production, 150
- and insulin-like activity, 323

HEREDITY

- See also* Familial tendency, Genes
- chronic pancreatitis, *566
- fructose intolerance, *282
- glycogen synthetase deficiency, *564
- metabolic defect, 202, *464

HEXOKINASE, and hexose uptake, *283

DIABETES: VOLUME 12 (1963) PAGE NUMBERS BY ISSUE

January-February, 1-98
March-April, 99-196

May-June, 197-292
July-August, 293-388

September-October, 389-480
November-December, 481-574

HEXYLRESORCINOL, and insulin, 246

HORMONES

- and hypoglycemia, 43, *464
- and ketonemia, 305
- and pancreatic transplants, *381
- pituitary, ketogenic action, 483
- and prediabetes, 522
- and pregnancy, diabetic, *88, 216
- sexual, and pancreatectomy, 231
- and stressful situations, 36
- thyroid, effect on adrenal medulla, *91

HYDROCORTISONE

- acetate, 301
- and diabetes, *93
- maternal, *462
- and hyperglycemic response to glucagon, *285
- and ketonemia, 484
- effect on pancreas, A374

17-HYDROXYCORTICOSTEROIDS, plasma level, 36, *95

HYPERCHOLESTEROLEMIA, 210 and asteroid bodies in vitreous, *91

HYPEREPINEPHRINEMIA, *87

HYPERGLYCEMIA

- alloxan-induced, 67
- amylase level, 141
- after anti-insulin serum, 75
- and corticosteroids, A374
- after diazoxide and trichlormethiazide, 336
- and early-onset diabetes, 506
- after epinephrine, *190
- after glucosamine, *187
- after glucose infusion, 205
- and hyperlipidemia, *90
- and hyperuricemia, *568
- and hypoglycemia, 33
- with idiopathic hyperlipemia, *88
- and insulin release, 162
- maternal, and islet hyperplasia in infants, 331
- morphine induced, *186
- and pancreatectomy, 241, 305
- and pyelonephritis predisposition, 57
- and regeneration of islets of Langerhans, 538-544
- sodium fluoracetate-induced, *189
- spontaneous, and pregnancy, 70
- temporary in infants, *91, *95

HYPERGLYCERIDEMIA, and age, 210

HYPERGLYCORRACHIA, *95

HYPERINSULINISM

- diagnosis, *379
- and early obesity, *382
- and glucose output, 206
- and leucine effect, 205-207
- and phenformin, 203
- and pregnancy, 402

HYPERLIPEMIA

- diet-induced, 34
- with hyperglycemia, *88
- and vascular disease, 208

HYPERLIPIDEMIA, *87 in uncontrolled diabetes, *90

HYPERPLASIA, and sulfonylurea therapy, *377

HYPERTENSION

- and diabetes mellitus, 47
- and glomerulosclerosis, 108
- in St. Kitts, West Indies, *384

HYPERTRIGLYCERIDEMIA, *88

HYPOGLYCEMIA

- alcohol-induced, A367
- blood glucose concentrations, *89
- unresponsiveness, *377
- and cardiac arrhythmia, *87
- and change from insulin to tolbutamide, *280
- chronic, *90
- clinical aspects, *93
- during diabetic pregnancy, 214
- diagnosis, *378
- and extrapancreatic neoplasm, *467
- ethanol-induced, A361, *464
- fasting, *464
- and fibrosarcoma, *92
- and glucagon, *282
- and gluconeogenesis, *464
- and glucose, intrapancreatic infusion, 437-442
- and growth hormone, *567
- and hyperglycemia, 33
- from insecticide poisoning, *465
- infantile, 256, *564, *566
- insulin
 - and adrenal secretion, 36
 - and coma, 38
 - dosage, *91
 - and glucose, 2, 19, 27
 - induced, 25
 - and cerebral high-energy phosphates, *95
 - infusion, 247
 - long- and intermediate-acting, 32
 - with insulinomas, *93
 - and islet cell adenomas, *89-90, *93, 419
 - leucine-induced, 205
 - and liver heat production, *90
 - manganese-induced, *286
 - postgastrectomy, 82-83
 - "relative," *280
 - spontaneous, 32
 - in children, 43, *280, *385
 - and ephedrine sulphate, 44
 - and partial pancreatectomy, *385
 - and thalidomide, *95
 - therapy, *382
 - and tolbutamide, *187, *562

HYPOKALEMIA, *87, *187

HYPOPHOSPHATEMIA, insulin-induced, *88

HYPOPHYSECTOMY

- and adrenalectomy, *466
- and amino acid accumulation, *94
- and hepatic enzymes, *95
- and pancreatectomy, 302, 482
- and adrenalectomy, 303
- and pancreatic diabetes, 482
- and retinopathy, 499
- and serum insulin-like activity, *462

I

IMPOTENCE, in male diabetics, 519-527, 559-560

INFANTS

- birth weight and hypoglycemia, *566
- carbohydrate metabolism, *285, *462
- and diabetes, temporary, *91, *95
- erythroblastotic, 330, *463, 533
- and glucose tolerance, *462
- glucose-6-phosphatase activity, *562
- and glycogenesis, generalized, *87
- and maternal diabetes, 66, *88
- and Addison's disease, *92, *94
- cortisol production, *462
- eosinophilic pancreatic infiltrates, A364, 528-537
- and hypoglycemia, 256
- neonatal problems, A364
- pancreas study, 327-331

INSULIN

- and alloxan, 433-436
- antagonists
 - in albumin-bound "B" chain, A353
 - in beta gamma globulins, 284
 - and deficiency, *385
 - and early diabetes, 506
- antibodies, *92, 148, *189, 346, 407, 451, *563
- detection, Skom and Talmage method, *569
- antilipolytic effects, A359
- assay
 - and glucose in obese subjects, 197-203
 - in insulinomas, *382
 - of metabolic effects, *185
 - in plasma of children, A363
 - technics, *86, *88
 - two-antibody system, 115-126, *189
- and beta cell development, *90
- bound
 - in beta cells, *185
 - to frog skeletal muscle, A360
 - globulin, 145
 - and glucose uptake, 79
 - in microaneurysms, 180
 - after tolbutamide, *379
- chemical structure, *567
- Crystalline, 539
- antisera, *93
- and dumping syndrome, *283

AUTHOR INDEX 1963

In this index are the names of authors of articles that have appeared in **DIABETES** and those whose articles have been abstracted in the Journal during 1963. Entries marked with an asterisk (*) indicate authors of material that appeared in the **ABSTRACTS** only. Those preceded by the letter "A" refer to Abstracts of Presented and By Title Papers, 23rd Annual Meeting of the American Diabetes Association. The **ABSTRACTS** were published in the July-August issue, pages 352-375. The Subject Index appears on page 1.

Reviewers

The Editors of *DIABETES: The Journal of the American Diabetes Association* are grateful to the following persons who reviewed books during the year 1963; or who, although not members of the Editorial Board, evaluated scientific contributions to the Journal.

BOOKS

Deaconess Maude Behrman, Atlantic City
George F. Cahill, Jr., M.D., Needham, Mass.
W. Stanley Hartroft, M.D., Toronto
Sami A. Hashim, M.D., New York
Bernard R. Landau, M.D., Ph.D., Cleveland
Hiromichi T. Narahara, M.D., St. Louis

Vaun A. Newill, M.D., Cleveland
Lillian Recant, M.D., St. Louis
Mary A. Root, Ph.D., Indianapolis
Stanley van den Noort, M.D., Cleveland
John V. Waller, M.D., New York
Robert C. Warner, Ph.D., New York

MANUSCRIPTS

Glenn Bartsch, Sc.D., Cleveland
Göran C. H. Bauer, M.D., New York
Bernard Becker, M.D., St. Louis
James Berkman, M.D., New Hyde Park, New York
Solomon A. Berson, M.D., New York
J. M. B. Bloodworth, Jr., M.D., Madison, Wis.
Oscar Bodansky, M.D., New York
William W. Bromer, Ph.D., Indianapolis
Josiah Brown, M.D., Los Angeles
George F. Cahill, Jr., M.D., Needham, Mass.
Norman Deane, M.D., New York
Saul J. Farber, M.D., New York
James B. Field, M.D., Bethesda
C. F. Gastineau, M.D., Rochester, Minn.
Frederick C. Goetz, M.D., Minneapolis
B. L. Horecker, Ph.D., New York
David M. Kipnis, M.D., St. Louis

Paul E. Lacy, M.D., Ph.D., St. Louis
Franklin C. McLean, M.D., Chicago
Robert Metz, M.D., Ph.D., Chicago
James V. Neel, M.D., Ann Arbor
Vaun A. Newill, M.D., Cleveland
Robert F. Pitts, M.D., New York
Albert E. Renold, M.D., Geneva, Switzerland
Mary A. Root, Ph.D., Indianapolis
Morton K. Schwartz, Ph.D., New York
Holbrooke S. Seltzer, M.D., Dallas
Martin Silberberg, M.D., St. Louis
Ethan A. H. Sims, Burlington, Vt.
Thomas G. Skillman, M.D., Omaha
Sidney Weinhouse, Ph.D., Philadelphia
Kelly M. West, M.D., Bethesda
Arne N. Wick, Ph.D., San Diego
S. L. Wilens, M.D., New York

Hugh L. C. Wilkerson, M.D., Needham, Mass.
